

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	XXXXXX XXXXXX
Project Name	A CRM Application for the Chai Shop & Co
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

I am: A small chai shop owner (“The Chai Shop & Co”) who serves many regular customers daily. I’m trying to: Keep track of my regular customers, their orders, and give them loyalty offers so they keep coming back. But: I currently use a notebook or just memory, so I often forget who is a regular customer, how many cups they bought, or who should get a free chai. Because: I don’t have a simple digital system to record customer details, purchases, and loyalty points, and I’m busy serving customers all day. Which makes me feel: Stressed and worried that I’m losing repeat customers and profits, and frustrated that I can’t run my shop more professionally.

Example:

Problem Statement (PS)	I am (Customer)	I’m trying to	But	Because	Which makes me feel
PS-1	Small Chai Shop owner	Keep track of my regular customers, their orders,	I currently use a notebook or just memory,	I don’t have a simple digital system to record customer details	Stressed and worried
