Project Name	A CRM Application for the Chai Shop & Co
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- - "I have many regular customers, but I can't remember all of them."
- - "Sometimes I forget who should get a free chai after 10 cups."
- - "I maintain everything in a notebook or in my head; it gets confusing during rush hours."
- - "I want something simple that my staff can also use."

THINKS

- - "If I lose my regular customers, my daily sales will drop."
- - "Other shops might give better offers and my customers will go there."
- - "I'm not very tech-savvy; will I be able to use this app?"

Sara

Small Chai shop owner

DOES

- - Writes customer names and dues in a register or notebook.
- - Remembers some regulars by face and gives informal discounts or free chai.
- - Counts cash at the end of the day and roughly estimates profit.

FEELS

- - *Stressed** during rush hours when he can't track orders and customers properly.
- - *Frustrated** when he realizes he forgot to give a loyalty benefit to a regular.
- - *Worried** that he is losing repeat customers and profits.
