

A CRM Application for the Chai Shop & Co

**Group Project by
Yasira .J, Dharshini. J
Suhaina .J, Sabeetha .S**

Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

User Story :

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.

Data Flow Diagram:

External Entity

1. Chai Shop Owner* – main user of the CRM.
2. *Staff / Cashier* – person who takes orders and uses the CRM at the counter.

Process

1. Chai Shop Owner* – main user of the CRM.
2. *Staff / Cashier* – person who takes orders and uses the CRM at the counter.
3. *Customer* – gives order details, receives loyalty benefits. From *Owner/Staff*: "New customer details" (name, phone, favorite item).- From *Owner/Staff*: "Update customer info".-

*Outputs:-

To *D1 Customer Database*: "Store/Update customer record".-

To *Owner/Staff*: "Confirmation: customer saved/updated".

Milestone 1

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

CRM APPLICATION FOR THE CHAI SHOP & CO

- Customize UI with clicks or any leading-edge web framework

Role*

Your job role

Company*

Company Name

1. First name & Last name
2. Email
3. Role : Developer
4. Company : College or Company Name
5. County : India
6. Postal Code : pin code
7. Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format : username@organization.com

Click on sign me up after filling these.

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

Milestone 2

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Employer Account
- **Plural Label** : Employer Accounts
- Enter Record Name Label and Format

Record Name : Employer Account Name

Data Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Customer Account
- **Plural Label** : Customer Accounts
- Enter Record Name Label and Format

Record Name : Customer Account Name

Data Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Enterprise Account
- **Plural Label** : Enterprise Accounts
- Enter Record Name Label and Format

Record Name : Enterprise Account Name

Data Type : Text

- In **Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Milestone 3

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4

1.Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follow

- App Name : TheChaiShop&Co
- Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory)

3. In App options

- Navigation style : Standard navigation
- Setup experience : setup

Supporters form factors : Desktop and phone

Then click Next

4. In Utility items

Utility Bar alignment : Default

Then click Next.

5. Navigation items

Select the created Custom Objects and required standard objects

- Customer Accounts

Employer Accounts

Enterprise Accounts

Reports

Dashboards

To add profile: System administrator

Click Save & Finish

Milestone 5

- **Label** : Payment Mode

Name : Auto populates

Values :

- Gpay
- PhonePay
- Paytm
- Credit or Debit card
- Cash.

Click **Save & New**.

- **Label** : Type of Items

Name : Auto populates

Values :

- Tea powder
- Cookies
- Gift Hampers

Click **Save**.

Milestone 6

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

Restrictions/Rules

☐ Date
 Allow users to enter a date or pick a date from a popup calendar.
☐ Date/Time
 Allow users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
☐ Email
 Allow users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Email or Email. Note that custom email addresses cannot be used for mass emails.
☐ Geolocation
 Allow users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
☐ Number
 Allow users to enter any number. Leading zeros are removed.
☐ Percent
 Allow users to enter a percentage number, for example, "10" and automatically adds the percent sign to the number.
☐ Phone
 Allow users to enter any phone number. Automatically formats it as a phone number.
☐ Picklist
 Allow users to select a value from a list you define.
☐ Picklist (Multi-Select)
 Allow users to select multiple values from a list you define.
☒ Text
 Allow users to enter any combination of letters and numbers.
☐ Text Area
 Allow users to enter up to 255 characters on separate lines.
☐ Text Area (Long)
 Allow users to enter up to 131,072 characters on separate lines.
☐ Text Area (Rich)
 Allow users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
☐ Text (Encrypted)
 Allow users to enter any combination of letters and numbers and store them as encrypted text.
☐ Time
 Allow users to enter a local time. For example, "12:45 PM", "14:45", and "14:45:00" are all valid times for this field.
☐ URL
 Allow users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

7. Click on next.

1. Data Type : Text

- Field Label: First Name
- Field Name : Auto Populates
- Length : 25
- Required : Check the box

Click on Next → Next → Save and new.

Repeat the Same steps for remaining fields

- Gender
- Last Name
- Phone Number
- Email ID
- Date of Birth
- Aadhar Number etc...

Milestone 7

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New

3. Page Layout Name : Online Orders and click Save.

Drag and Arrange all the required fields as shown below.

Customer Details

Record Type	Sample Text	Owner	Sample Text
Account Entity Name	Sample Text	Phone Number	1-415-555-1212
First Name	Sample Text	Email ID	sarah.sample@company.com

Click **Save**

Milestone 8

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.

3. Enter Details :

- Existing Record Type : Master
- Record Type Label : Online Order
- Record Type Name : Auto Populates
- Active : Tick the checkbox

Click Next

New Record Type
Customer Account

Step 1 of 2

Enter a name and description for the new record type. The new record type will include all the picklist values from the existing record type selected below. After saving the new record type, you will be able to customize the picklist values.

Record Type

Existing Record Type: Master

Record Type Label: Online Order

Record Type Name: Online_Order

Description:

Active: ☒

Select Make Available to give users assigned to this profile the ability to create and close records of this record type, or assign this record type to existing records. To make the new record type the default for a profile, select Make Default. Users assigned to this record type can still view and edit records associated with record types not available for their profiles.

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Online orders** from the drop down menu.

Select the page layout that users with this profile see for records with this record type. After saving, choose the picklist values that are available with this record type.

☒ Apply one layout to all profiles Online Orders

☐ Apply a different layout for each profile

5. Click **Save and New**.

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.
3. Enter Details :
 - Existing Record Type : Master
 - Record Type Label : Walk-In Order
 - Record Type Name : Auto Populates
 - Active : Tick the checkbox

Click Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

5. Click **Save**.

Milestone 9

1. Go to the setup page → click on object manager → From drop down click edit for **Employer Account** object.
2. Click on the validation rule → click New.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Aadhar_Number	Top of Page	Aadhar number is required. Aadhar number must be 12 digits long. Aadhar number can only contain numeric digits. Aadhar number never starts with 0.	✓	Soham Gupte, 10/04/2024, 7:43 pm
PAN_Number	Top of Page	The PAN Equals field must not be blank. (The PAN card number does not start with 0). The PAN card number does not contain special characters.	✓	Soham Gupte, 10/04/2024, 8:10 pm
Phone_Number	Top of Page	The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.).	✓	Soham Gupte, 10/04/2024, 2:54 pm

3. Enter Rule Name : Aadhar Number

Error Condition Formula : AND(
 NOT(ISBLANK(Aadhar_Number__c)),
 LEN(Aadhar_Number__c) <> 12,
 NOT(REGEX(Aadhar_Number__c , "[1-9]{12}\$")))

Validation Rule Edit

Rule Name: Aadhar_Number

Active: ☒

Description:

Error Condition Formula

Example: Discount_Percent__c > 30
 Display an error if Discount is more than 30%
 If this formula expression is **true**, display the text defined in the Error Message area

Insert Field | Insert Operator

AND(NOT(ISBLANK(Aadhar_Number__c)), LEN(Aadhar_Number__c) <> 12, NOT(REGEX(Aadhar_Number__c , "[1-9]{12}\$")))

Functions: All Function Categories, ABS, ACOS, ADDMONTHS, AND, ASCII, ASIN, Insert Selected Function, ADD(number), Returns the absolute value of a number, a number without its sign, Help on this Function

Check Syntax: No errors found

4. **Error Message** : Aadhar number is required.
 The Aadhar number must be 12 digits long.
 Aadhar number can only contain numeric digits.
 Aadhar number never starts with 0
5. Click **Save & New**.

Error Message

Example: Discount percent cannot exceed 30%

This message will appear when Error Condition formula is **true**

Error Message: Aadhar number is required.
 The Aadhar number must be 12 digits long.
 Aadhar number can only contain numeric digits.
 Aadhar number never starts with 0.

This error message can either appear at the top of the page or below a specific field on the page

Error Location: ☒ Top of Page ☐ Field

Save Save & New Cancel

6. Repeat the same steps and create two more validation rules on the employer account object.

Enter Rule Name : PAN Number

Error Condition Formula :

```
AND(  
NOT(ISBLANK( Phone_Number__c )),  
NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
NOT(REGEX( Phone_Number__c , "\d+$")) )
```

Enter Rule Name : PAN Number

Error Condition Formula :

```
AND(  
NOT(ISBLANK( Phone_Number__c )),  
NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
NOT(REGEX( Phone_Number__c , "\d+$")) )
```

Error Message : The PAN Details field must not be blank.

The PAN card number does not start with 0.

The PAN card number does not contain special characters.

Click **Save & New**.

- **Enter Rule Name :** Phone Number

Error Condition Formula :

```
AND(  
NOT(ISBLANK( Phone_Number__c )),  
NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
NOT(REGEX( Phone_Number__c , "\d+$"))
```

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

Click Save.

Milestone 10

1. Go to setup, In quick find box enter Email template → click on classic Email Template.
2. Click on→ New Email Template
3. Choose the type of email template you would like to create : **Text** and click **Next**.

In conclusion, the development of TheChaiShop&Co CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.
