

Coding & Solution

Date	29 September 2026
Team ID	SWUID2026318872
Project Name	A CRM Application for the Chai Shop & Co
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[https://github.com/yasirasathik-js/Salesforce-TheChaiShop-Co]
Programming Language(s)	Salesforce configuration, Javascript
Framework(s) Used	Salesforce Lightning platform, Lightning App Builder, Salesforce flow builder, Lightning experience
Key Features Implemented	ChaiShop&Co Lightning App, Customer Acc, Employer Acc, Enterprise Acc, Custom tabs, global picklists, fields, page layouts, validation rules
Pending / Incomplete Features	Online payment integration, SMS or WhatsApp notifications, customer loyalty module, inventory automation, online ordering portal, and advanced analytics
Setup / Run Instructions	Log in to the Salesforce Developer Org, open the App Launcher, select the ChaiShop&Co Lightning App, open the required tabs, and create or view records. <u>Configure custom objects, fields, picklists, flows, reports, and dashboards before use</u>

use

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project is developed using Salesforce Lightning tools and focuses on customer and business record management. Core CRM features are implemented, while online ordering, payments, notifications, loyalty, and advanced inventory features are planned for future development
