| <b>Project Name</b>  | A CRM Application for the Chai Shop & Co |
| <b>Maximum Marks</b> | 1 Mark                                   |

### Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

### Current System Limitations:

| S.No | Limitation                                  | Impact                                            | Priority to Address<br>(High / Medium / Low) |
|------|---------------------------------------------|---------------------------------------------------|----------------------------------------------|
| 1    | Manual billing & order entry in notebook    | Errors, slow billing, loss of data                | High                                         |
| 2    | No real-time inventory tracking             | Stock-out, over-purchasing                        | High                                         |
| 3    | No sales reports & customer feedback system | Can't identify top-selling chai & improve service | Medium                                       |

### Scalability Plan:

| S.No | Scalability Aspect | Current State                  | Proposed Upgrade / Solution                                      |
|------|--------------------|--------------------------------|------------------------------------------------------------------|
| 1    | User Load          | Single shop, 5-10 users        | Salesforce Cloud scalable - add Roles, Profiles for multi-branch |
| 2    | Data Storage       | Basic custom objects storage   | Use big objects, data archiving, buy extra storage if needed     |
| 3    | Performance        | Flows/ Triggers for low volume | Bulkify Apex, use async Apex, indexed fields for faster reports  |
| 4    | Security           | Basic profile security         | Add sharing rules, MFA, Field-level Security, encryption         |

### Future Roadmap:

| Phase | Planned Feature / Enhancement | Target Timeline | Expected Impact |
|-------|-------------------------------|-----------------|-----------------|
|-------|-------------------------------|-----------------|-----------------|

|         |                                                      |            |                                        |
|---------|------------------------------------------------------|------------|----------------------------------------|
| Phase 2 | Salesforce CRM Core objects, Flows, Triggers, LWC UI | Completed  | Automated billing & inventory          |
| Phase 3 | Online ordering, UPI Payment & WhatsApp integration  | 2-3 months | Increase customer reach & easy payment |
| Phase 4 | Multi-branch support & Loyalty programs with points  | 4-6 months | Expand business & retain customers     |
